

# Bass guitar

Master of Music Pop

---

The judging of the bass guitar admission exam will take account of talent, creativity and individuality. In addition, technique, musical ear, theoretical knowledge and reading notes/chords are important.

Show at least a level of a graduate BM bass guitar student. Moreover, you need to have a good motivation behind your choice of the master.

At the admission audition you play 2 to 3 songs, preferably with as "broad" an orientation as possible (in various styles). Playing with your own band is preferred.

The applicant is able to convincingly explain the focus of your research topic/project and the connection and relevance to both the craft and the pop practice.
